## Implantology Days

27 – 28 April 2012  
Tuttlingen | Germany

## Preface

Dear Colleagues,

Enossal implantation has revolutioned dentistry for it has been established as a predictable option for the treatment of edentulous patients. Aimed at approximating complete remission, the implant should meet not only functional requirements, but also aesthetic expectations.

For this, perfect implant positioning with longterm success often requires augmentation of hard- and soft tissue, these procedures also have to meet complete reliability.

Here a variety of tools is required to achieve optimal results, a profound knowledge of different ways of hard tissue augmentation, as well as soft tissue management techniques and especially suturing modulations are of great importance.

This interesting workshop offers theoretical and practical modules, to assist in improving overall dental implantology skills.

We are looking forward to meeting you in Tuttlingen.

Yours,

Stephan Beuer,  
DDS

Torsten Kamm,  
DDS

Marko Knauf,  
DDS

Andres Stricker,  
MD DDS

Nils Weyer,  
MD DDS
