

Introductory course to **Implantology**

**Theoretical and Practical
Introduction To Implantology**

Date : 18th - 21st September 2010

Location : Florence, Italy

Clinical application of the restoration.

Clinical follow up 3 years post application.

Introductory Course To Implantology

We are pleased to announce new dates for the Introductory Course To Implantology. Held in Florence at Leone's ISO Training Institute, the 4 day Introduction to Implantology course combines theoretical and practical sessions hosted by Dr Lawrence YK Ching (UK) & Dr Mario Guerra (Italy).

Aims:

To allow the clinician to diagnose, treatment plan and place low complex implant cases.

Programme of Events:

Saturday 18th, Arrive in Florence.

Sunday 19th, Organised trip to a famous winery in the beautiful area of Chianti, plus designer shopping experience.

Monday 20th, Day 1 Introduction to Implantology course.
Theoretical course sessions.

Tuesday 21st, Day 2 Introduction to Implantology course.
Practical sessions & live surgery.

Tuesday evening end of course dinner with course speakers.

Wednesday 22nd, Depart Florence.

Course Fees:

There are 3 different price options for the course, as explained below.

The course fee includes.

- >> Offer 1, 2 or 3.
- >> Return flight to the UK.
- >> 4 nights hotel accommodation, in a double room inc. Breakfast.
- >> Sunday Chianti winery trip & designer shopping experience.
- >> Transfers to & from hotel to Leone's ISO Training Institute.
- >> End of course dinner.

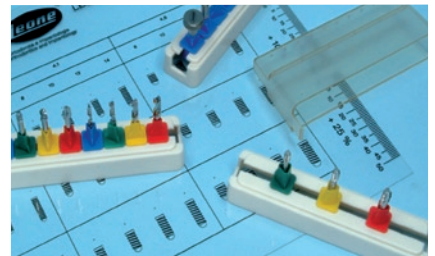

On completing the course participants will receive 12 hours verifiable CPD.

Template 156-2003-00, Ratchet 156-1014-00

Offer price £2645
Includes 4 Day Trip To Florence

OFFER TWO

Purchase of 25 implants + 25 healing caps
1 Surgical kit with long or short drills 156-0016-02 or 156-0016-01
Template 156-2003-00

Offer price £4400
Includes 4 Day Trip To Florence

OFFER THREE

Purchase of 35 implants + 35 healing caps
1 Surgical kit complete 156-0016-03
Template 156-2003-00

Offer price £6165
Includes 4 Day Trip To Florence

No internal screw, Conometric connection, Perfect Bacterial Seal, No micro movements, Optimal distribution of load

Platform Switching

The “platform switching” design of the transmucosal neck improves height and volume of the soft connective tissue, while sealing off and protecting the bone crest. The system’s exclusive EXACONE™ connection guarantees an absence of micro movement and infiltrations, improving the health of the soft tissue.

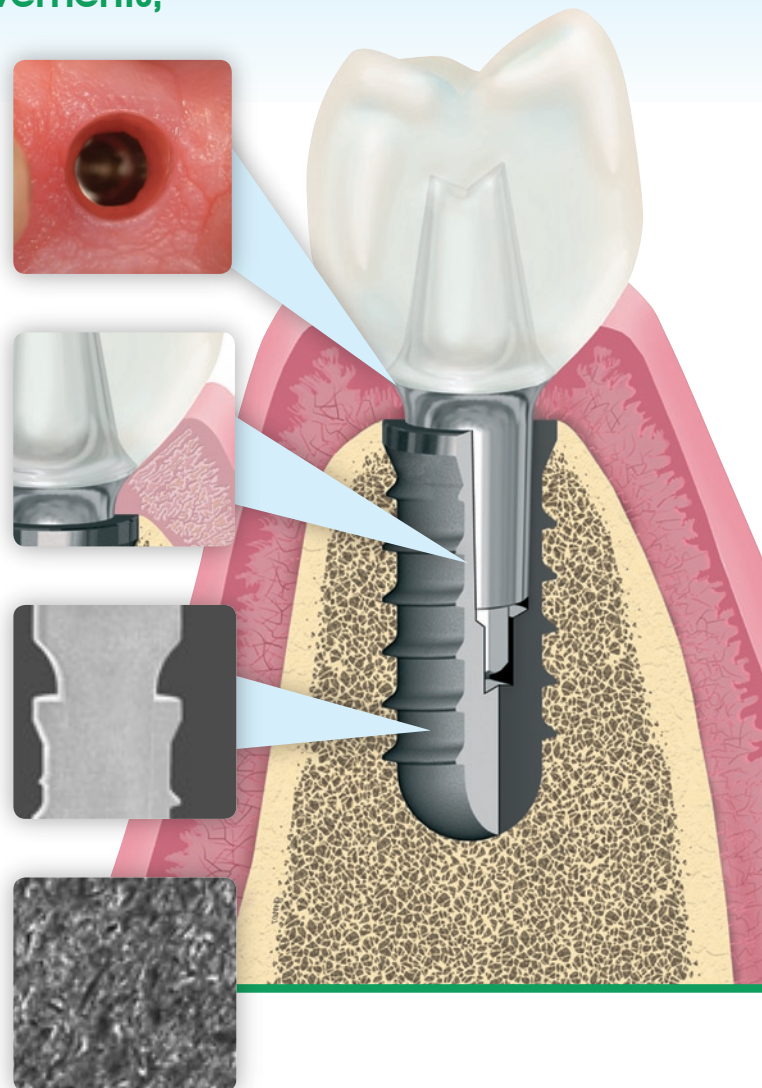

The EXACONE™ Connection

The EXACONE™ connection system, thanks to the self-locking properties of the Morse cone and to the internal hexagon’s resistance to torsion movements guarantees, the following:

- >> total stability, with no more gaps and micro movements.
- >> maximum resistance to dislocating loads.
- >> accuracy during transfers from the dental office to the lab.
- >> implant fixture and abutment are safely and easily joined.

The Implant’s HRS™ Surface

The High Rutile Surface (HRS) of the Leone Exacone Implant is obtained through an exclusive sandblasting procedure that creates an equal roughness throughout the implant body ($R_a = 2.5 \mu m$). In addition, this process makes a larger quantity of rutile (Titanium Oxide) available, thus making the surface ideal for the formation of coagulum and subsequently osseointegration. The use of this innovative technology results in extremely short healing times.

Lawrence Y-K Ching - Specialist in Prosthodontics
B.D.S.(Lond.), M.Sc.(Lond.), M.R.D. R.C.S.(Edin.), M.R.D., L.D.S. R.C.S.(Eng.), M.F.G.D.P.(U.K.)

Lawrence qualified in 1991 from Guy's Hospital Dental School, London and has been a registered Specialist in Prosthodontics since 2000.

Lawrence was awarded the 3M Prize and MSc with Distinction in Conservative Dentistry by the Eastman Dental Institute in 1996. Since that time, he has been actively involved in implant dentistry and is familiar with multiple systems and their concepts.

He is committed to continuing education and the promotion of clinical excellence.

He spent several years as a Clinical Lecturer (part-time) at King's College London Dental Institute, and has also lectured at postgraduate courses and been an examiner for organisations including the Royal College of Surgeons and the General Dental Council.

Lawrence is based at the Harley Street Dental Centre, a referral practice in Central London with an emphasis on Restorative and Reconstructive Dentistry.

Dr Mario Guerra

M.D. graduate cum laude in Medicine and Surgery in 1982 - University of Rome, D.D.S degree in Dentistry at the University of Perugia. Dott. Guerra has been director of the Dental department at Gubbio Hospital since 1984.

He has been the Corporate Dental Stomatology Coordinator of ASL no. 1 (Public Health Unit) since 1991 and has been the Dental Dept. Director of Thyssen Krupp in Terni since 1995. From 1988 to 2003 he worked as a professor at the University of Perugia at the Dental School. Mario Guerra worked as a professor in the School of specialization in Reumatology at the University of Ancona in the academic year 1993-94.

He has attended numerous international courses and congresses in dental stomatology and attended most as a lecturer of his original presentations. He is a Member of the European Academy of Osseointegration and American Academy of Osseointegration.

Mario has published articles in Italy and International dental journals, many of these articles being on a experimental nature focusing on both Oral Implantology and Orthodontics.

He teaches basic and advanced Implantology courses for public and private institutions.
